Title: Effects of annealing and conformal alumina passivation on anisotropy and hysteresis of magneto-optical properties of cobalt slanted columnar thin films

Author: Chad Briley Alyssa Mock Rafal Korlacki Tino Hofmann Eva Schubert Mathias Schubert

PII: S0169-4332(16)32930-0
DOI: <http://dx.doi.org/doi:10.1016/j.apsusc.2016.12.198>
Reference: APSUSC 34745

To appear in: *APSUSC*

Received date: 29-7-2016
Revised date: 18-11-2016
Accepted date: 24-12-2016

Please cite this article as: Chad Briley, Alyssa Mock, Rafal Korlacki, Tino Hofmann, Eva Schubert, Mathias Schubert, Effects of annealing and conformal alumina passivation on anisotropy and hysteresis of magneto-optical properties of cobalt slanted columnar thin films, *Applied Surface Science* (2016), <http://dx.doi.org/10.1016/j.apsusc.2016.12.198>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- Reveal magneto-optical response of cobalt slanted columnar thin films prior to and after heat treatment
- Study passivation effects of conformal alumina coating on magneto-optical properties
- Demonstrate loss of measurable magneto-optical response from cobalt oxide slanted columnar thin films from heat treatment
