Title: Partially coherent light propagation in stratified media containing an optically thick anisotropic layer

Author: Shane M. Nichols Oriol Arteaga Alexander T. Martin
Bart Kahr

PII: S0169-4332(16)32270-X
DOI: <http://dx.doi.org/doi:10.1016/j.apsusc.2016.10.146>
Reference: APSUSC 34240

To appear in: *APSUSC*

Received date: 31-7-2016
Revised date: 21-10-2016
Accepted date: 22-10-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- In stratified media, five regimes of coherence were identified
- Three algebraic methods were developed to model regimes of partial coherence
- Our models show good agreement with measurements and direction integration
