This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Stable and conformable superhydrophilic surface fabricated via surface-initiated silicification on polyaniline nanofibers

Handong Cho ^a, Moonsu Kim ^a, Sangmin Lee ^{b,*}, and Woonbong Hwang ^{a,*}

Sangmin Lee: slee98@cau.ac.kr

Highlights

- A method to fabricate stable and conformable superhydrophilic surfaces is proposed
- The resulting surface showed enhanced wettability and stable superhydrophilicity
- Conformable superhydrophobic–superhydrophilic patterned surfaces can be realized
