This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

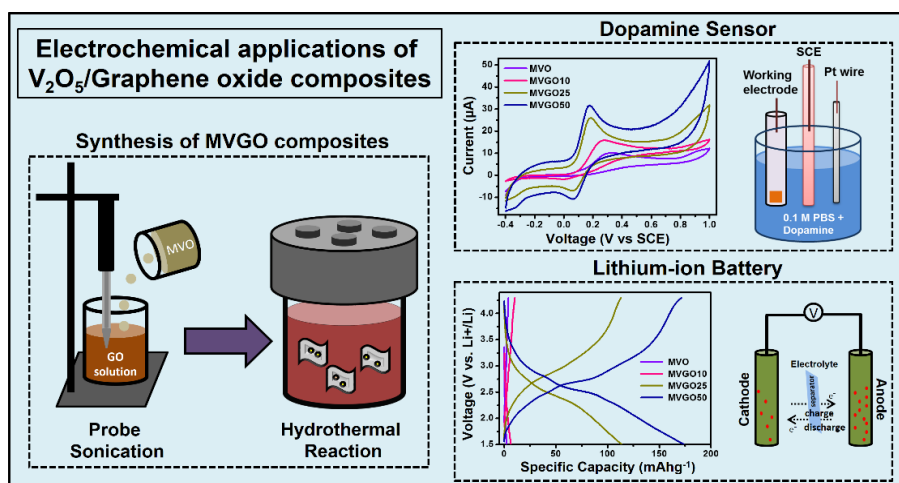

Melt quenched vanadium oxide sandwiched in graphene oxide sheets as composite electrodes for amperometric dopamine sensing and lithium ion battery applications
