Title: Facile one-pot synthesis of nickel-incorporated titanium dioxide/graphene oxide composites: enhancement of photodegradation under visible-irradiation

Author: Thanh-Truc Pham Chinh Nguyen-Huy Eun Woo Shin

PII: S0169-4332(16)30600-6
DOI: <http://dx.doi.org/doi:10.1016/j.apsusc.2016.03.144>
Reference: APSUSC 32910

To appear in: *APSUSC*

Received date: 17-12-2015
Revised date: 12-3-2016
Accepted date: 15-3-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Facile one-pot synthesis of nickel-incorporated titanium
dioxide/graphene oxide composites: enhancement of
photodegradation under visible-irradiation**
