Title: CuNi NPs supported on MIL-101 as highly active catalysts for the hydrolysis of ammonia borane

Authors: Doudou Gao, Yuhong Zhang, Liquan Zhou, Kunzhou Yang

PII: S0169-4332(17)32525-4
DOI: <http://dx.doi.org/10.1016/j.apsusc.2017.08.167>
Reference: APSUSC 37004

To appear in: *APSUSC*

Received date: 25-7-2017
Revised date: 16-8-2017
Accepted date: 24-8-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

CuNi NPs supported on MIL-101 as highly active catalysts for the hydrolysis of ammonia borane

Doudou Gao, Yuhong Zhang, Liqun Zhou*, Kunzhou Yang
