

## Accepted Manuscript

Title: Exploring the catalytic activity of pristine T6[100] surface for oxygen reduction reaction: A first-principles study

Author: Paramita Banerjee Soubhik Chakrabarty Ranjit  
Thapa G.P. Das

PII: S0169-4332(16)32425-4  
 DOI: <http://dx.doi.org/doi:10.1016/j.apsusc.2016.11.057>  
 Reference: APSUSC 34361

To appear in: *APSUSC*

Received date: 15-10-2016  
Revised date: 7-11-2016  
Accepted date: 7-11-2016

Please cite this article as: Paramita Banerjee, Soubhik Chakrabarty, Ranjit Thapa, G.P.Das, Exploring the catalytic activity of pristine T6[100] surface for oxygen reduction reaction: A first-principles study, Applied Surface Science <http://dx.doi.org/10.1016/j.apsusc.2016.11.057>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Exploring the catalytic activity of pristine T6[100] surface for oxygen reduction reaction: A first-principles study
