

## Accepted Manuscript

Title: Analysis of nanopore arrangement of porous alumina layers formed by anodizing in oxalic acid at relatively high temperatures

Author: Leszek Zaraska Wojciech J. Stepniowski Marian Jaskuła Grzegorz D. Sulka

PII: S0169-4332(14)00705-3  
DOI: <http://dx.doi.org/doi:10.1016/j.apsusc.2014.03.154>  
Reference: APSUSC 27555

To appear in: *APSUSC*

Received date: 2-2-2014  
Revised date: 15-3-2014  
Accepted date: 23-3-2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Analysis of nanopore arrangement of porous alumina layers formed by anodizing in oxalic acid at relatively high temperatures**
