Title: The effect of betaine on the foam stability: Molecular Simulation

Authors: Fengfeng Gao, Guokui Liu, Shiling Yuan

PII: S0169-4332(17)30449-X
DOI: <http://dx.doi.org/doi:10.1016/j.apsusc.2017.02.087>
Reference: APSUSC 35196

To appear in: *APSUSC*

Received date: 1-7-2016
Revised date: 13-12-2016
Accepted date: 11-2-2017

Please cite this article as: Fengfeng Gao, Guokui Liu, Shiling Yuan, The effect of betaine on the foam stability: Molecular Simulation, *Applied Surface Science* <http://dx.doi.org/10.1016/j.apsusc.2017.02.087>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The effect of betaine on the foam stability: Molecular Simulation
