Title: Enhanced photocatalytic activity of C@ZnO core-shell nanostructures and its photoluminescence property

Author: Tao Chen Shanwen Yu Xiaoxin Fang Honghong Huang Lun Li Xiuyuan Wang Wang Huihu

PII: S0169-4332(16)31558-6
DOI: <http://dx.doi.org/doi:10.1016/j.apsusc.2016.07.122>
Reference: APSUSC 33690

To appear in: *APSUSC*

Received date: 1-5-2016
Revised date: 18-7-2016
Accepted date: 20-7-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Enhanced photocatalytic activity of C@ZnO core-shell nanostructures and its photoluminescence property

Wuhan City,
Hubei Province, P. R. China

Postal Code: 430068

Highlights

- C@ZnO nanostructures were synthesized by a facile hydrothermal carbonization
