Title: Fractional statistical theory of finite multilayer adsorption

Author: A. Takara E. Quiroga D.A. Matoz-Fernandez N.A. Ochoa A.J. Ramirez-Pastor

PII: S0169-4332(15)02641-0
DOI: <http://dx.doi.org/doi:10.1016/j.apsusc.2015.10.211>
Reference: APSUSC 31692

To appear in: *APSUSC*

Received date: 5-8-2015
Revised date: 5-10-2015
Accepted date: 28-10-2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Fractional statistical theory of finite multilayer adsorption

A. Takara, E. Quiroga, D. A. Matoz-Fernandez, N. A. Ochoa, A. J. Ramirez-Pastor

Highlights

> A new theoretical framework to model adsorption is presented. > The formalism is based on a generalization of the fractional statistics theory. > The theory is applied to interpret experimental data of BSA protein adsorption. > The results indicate the occurrence of finite multilayer adsorption.
