Title: Removal of Nitrobenzene by Immobilized Nanoscale Zero-valent Iron: Effect of Clay Support and Efficiency Optimization

Author: Xiaoguang Li Ying Zhao Beidou Xi Xuhui Mao Bin Gong Rui Li Xing Peng Hongliang Liu

PII: S0169-4332(16)00178-1
DOI: <http://dx.doi.org/doi:10.1016/j.apsusc.2016.01.141>
Reference: APSUSC 32373

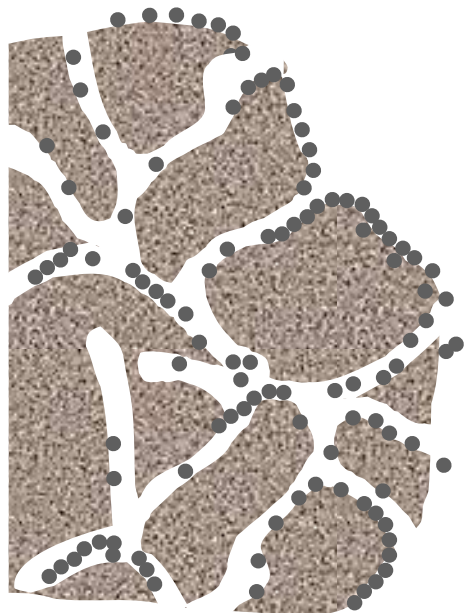

To appear in: *APSUSC*

Received date: 1-10-2015
Revised date: 13-1-2016
Accepted date: 16-1-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

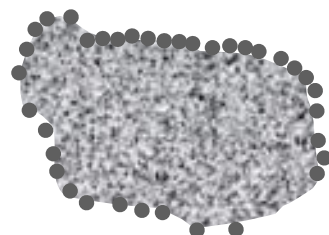

nZVI: nanoscale zero-valent iron

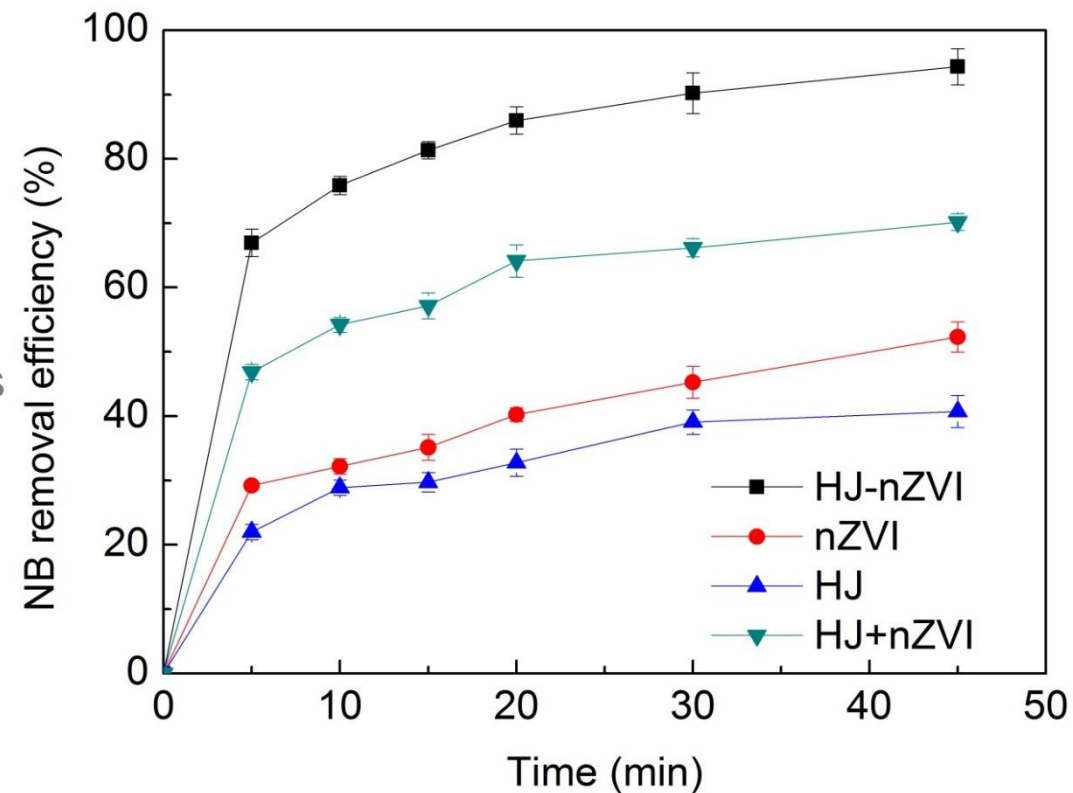

HJ clay supported nZVI particles
(HJ-nZVI)

Montmorillonite supported nZVI particles
(M-nZVI)

Kaolinite supported nZVI particles
(K-nZVI)
