Title: Green synthesis of highly fluorescent carbon quantum dots from sugarcane bagasse pulp

Author: S. Thambiraj D.Ravi Shankaran

PII: S0169-4332(16)31749-4

DOI: <http://dx.doi.org/doi:10.1016/j.apsusc.2016.08.106>

Reference: APSUSC 33855

To appear in: *APSUSC*

Received date: 15-4-2016

Revised date: 11-8-2016

Accepted date: 22-8-2016

Please cite this article as: S.Thambiraj, D.Ravi Shankaran, Green synthesis of highly fluorescent carbon quantum dots from sugarcane bagasse pulp, Applied Surface Science <http://dx.doi.org/10.1016/j.apsusc.2016.08.106>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Green synthesis of highly fluorescent carbon quantum dots from sugarcane bagasse pulp

Graphical Abstract

Schematic representation of CQDs from sugarcane bagasse carbon

Highlights

- ❖ CQDs were synthesised from sugarcane bagasse waste with top down approaches
- ❖ Synthesis method is green, simple and efficient process.
