Title: Porous Graphene for High Capacity Lithium Ion Battery Anode Material

Author: Yusheng Wang Qiaoli Zhang Min Jia Dapeng Yang  
Jianjun Wang Meng Li Jing Zhang Qiang Sun Yu Jia

PII: S0169-4332(15)03015-9  
DOI: <http://dx.doi.org/doi:10.1016/j.apsusc.2015.11.264>  
Reference: APSUSC 32003

To appear in: *APSUSC*

Received date: 7-10-2015  
Accepted date: 30-11-2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- Porous graphene sheet as Li storage media.
- Excellent mobility both along in-plane and out-plane directions.
- The interactions can be easily tuned by an applied strain.
