

## Accepted Manuscript

Title: Invisible High Workfunction Materials on Heterogeneous Surfaces

Author: Anirudh Sharma Rüdiger Berger David A. Lewis  
Gunther G. Andersson

PII: S0169-4332(14)02570-7  
DOI: <http://dx.doi.org/doi:10.1016/j.apsusc.2014.11.089>  
Reference: APSUSC 29134

To appear in: *APSUSC*

Received date: 28-8-2014  
Accepted date: 18-11-2014

Please cite this article as: A. Sharma, R. Berger, D.A. Lewis, G.G. Andersson, Invisible High Workfunction Materials on Heterogeneous Surfaces, *Applied Surface Science* (2014), <http://dx.doi.org/10.1016/j.apsusc.2014.11.089>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Heterogeneous surfaces show a distribution in their surface properties.  
The higher workfunction components contribute less to the secondary electron cut-off.  
The higher workfunction components are overlooked in the workfunction analysis.  
The analysis of electronic device performance is affected.
