Temperature effects in static and dynamic polarizabilities from distinct generalized gradient approximation exchange-correlation functionals

Javier Carmona-Espíndola, José L. Gázquez, Alberto Vela, S.B. Trickey

PII: S0009-2614(16)30784-9

DOI: <http://dx.doi.org/10.1016/j.cplett.2016.10.014>

Reference: CPLETT 34238

To appear in: *Chemical Physics Letters*

Received Date: 30 June 2016

Revised Date: 4 October 2016

Accepted Date: 5 October 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Temperature effects in static and dynamic polarizabilities from distinct generalized gradient approximation exchange-correlation functionals
