Defect-induced Raman spectroscopy in single-layer graphene with boron and nitrogen substitutional defects by theoretical investigation

Jie Jiang, Ruth Pachter, Ahmad E. Islam, Benji Maruyama, John J. Boeckl

PII: S0009-2614(16)30741-2

DOI: <http://dx.doi.org/10.1016/j.cplett.2016.09.067>

Reference: CPLETT 34208

To appear in: *Chemical Physics Letters*

Received Date: 1 September 2016

Revised Date: 23 September 2016

Accepted Date: 25 September 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Defect-induced Raman spectroscopy in single-layer  
graphene with boron and nitrogen substitutional defects  
by theoretical investigation
