Title: Using symmetry-adapted optimized sum-of-products basis functions to calculate vibrational spectra

Author: Arnaud Leclerc Tucker Carrington

PII: S0009-2614(15)00928-8
DOI: <http://dx.doi.org/doi:10.1016/j.cplett.2015.11.057>
Reference: CPLETT 33461

To appear in:

Received date: 4-11-2015
Revised date: 25-11-2015
Accepted date: 29-11-2015

Please cite this article as: Arnaud Leclerc, Tucker Carrington, Using symmetry-adapted optimized sum-of-products basis functions to calculate vibrational spectra, *Chemical Physics Letters* (2015), <http://dx.doi.org/10.1016/j.cplett.2015.11.057>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Calculating vibrational eigenstates does not require storing full-dimensional vectors

Sum-of-product basis functions can be symmetry-adapted to obtain symmetry labels

Obtaining vibrational states of a six atom molecule requires less than 1GB of memory
