This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Well distributed silver nanoparticles on reduced graphene oxide
- Excellent electrochemical performance of the silver doped graphene oxide
- Dramatic decrease of impedance of the composite
- The silver doped graphene oxide in the form of powder or free-standing film
