Structural stability and growth mechanism of neutral and anionic small carbon clusters: Density functional study

A.C. Ngandjong, J.Z. Mezei, J. Mougenot, A. Michau, K. Hassouni, G. Lombardi, M. Seydou, F. Maurel

PII: S2210-271X(17)30019-1

DOI: <http://dx.doi.org/10.1016/j.comptc.2017.01.012>

Reference: COMPTC 2372

To appear in: *Computational & Theoretical Chemistry*

Received Date: 22 November 2016

Revised Date: 11 January 2017

Accepted Date: 11 January 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Structural stability and growth mechanism of neutral and anionic small carbon clusters: Density functional study
