

## Accepted Manuscript

Structure prediction of nanoclusters from global optimization techniques: computational strategies and connection to experiments

Philippe Carbonnière, Michel Rérat, Fernand Spiegelman, Ajit J. Thakkar

PII: S2210-271X(17)30104-4  
DOI: <http://dx.doi.org/10.1016/j.comptc.2017.03.007>  
Reference: COMPTC 2434

To appear in: *Computational & Theoretical Chemistry*

Received Date: 4 March 2017  
Accepted Date: 4 March 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Structure prediction of nanoclusters from global optimization techniques:  
computational strategies and connection to experiments
