Predicting standard reduction potential for anticancer Au(III)-complexes: A DFT study

G.Y. Sánchez Delgado, D. Paschoal, H.F. Dos Santos

PII: S2210-271X(17)30140-8

DOI: <http://dx.doi.org/10.1016/j.comptc.2017.03.027>

Reference: COMPTC 2454

To appear in: *Computational & Theoretical Chemistry*

Received Date: 24 January 2017

Revised Date: 21 March 2017

Accepted Date: 22 March 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Predicting standard reduction potential for anticancer Au(III)-complexes: A DFT study
