Binary mixed carbon, silicon, nitrogen, and phosphorus cubane derivatives as potential high energy materials

Sierra Rayne, Kaya Forest

PII: S2210-271X(16)30001-9
DOI: <http://dx.doi.org/10.1016/j.comptc.2016.01.017>
Reference: COMPTC 2045

To appear in: *Computational & Theoretical Chemistry*

Received Date: 13 January 2016
Revised Date: 23 January 2016
Accepted Date: 25 January 2016

Please cite this article as: S. Rayne, K. Forest, Binary mixed carbon, silicon, nitrogen, and phosphorus cubane derivatives as potential high energy materials, *Computational & Theoretical Chemistry* (2016), doi: <http://dx.doi.org/10.1016/j.comptc.2016.01.017>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Binary mixed carbon, silicon, nitrogen, and phosphorus cubane derivatives as
potential high energy materials**
