Title: Coincidence spectroscopy: past, present and perspectives

Author: Tiberiu Arion Uwe Hergenbahn

PII: S0368-2048(15)00131-0

DOI: <http://dx.doi.org/doi:10.1016/j.elspec.2015.06.004>

Reference: ELSPEC 46459

To appear in: *Journal of Electron Spectroscopy and Related Phenomena*

Received date: 2-2-2015

Revised date: 7-5-2015

Accepted date: 7-6-2015

Please cite this article as: T. Arion, U. Hergenbahn, Coincidence spectroscopy: past, present and perspectives, *Journal of Electron Spectroscopy and Related Phenomena* (2015), <http://dx.doi.org/10.1016/j.elspec.2015.06.004>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The development of the coincidence spectroscopy method is summarized in short.
- Several coincidence techniques, with their advantages and drawbacks are discussed.
- New results on the Auger decay of CH₃F are presented and discussed.
- We give an outlook on the possible application of coincidence methods in FEL science
