

Accepted Manuscript

A flow-through, elevated-temperature and -pressure NMR apparatus for in-situ CO₂ sequestration studies

Erika L. Sesti, Jinlei Cui, Sophia E. Hayes, Mark S. Conradi

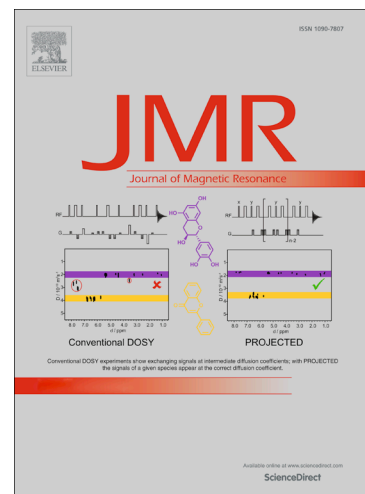

PII: S1090-7807(17)30202-1
DOI: <http://dx.doi.org/10.1016/j.jmr.2017.08.005>
Reference: YJMRE 6144

To appear in: *Journal of Magnetic Resonance*

Received Date: 6 June 2017
Revised Date: 9 August 2017
Accepted Date: 10 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A flow-through, elevated-temperature and - pressure NMR apparatus for in-situ CO₂ sequestration studies

Erika L. Sesti^a, Jinlei Cui^a, Sophia E. Hayes^a, and Mark S. Conradi^{b,c}
