

## Accepted Manuscript

Cellulose based grafted biosorbents - Journey from lignocellulose biomass to toxic metal ions sorption applications - A review

Rajesh Kumar, Rajeev K. Sharma, Anirudh P. Singh

PII: S0167-7322(16)33958-7  
DOI: doi: [10.1016/j.molliq.2017.02.050](https://doi.org/10.1016/j.molliq.2017.02.050)  
Reference: MOLLIQ 6963

To appear in: *Journal of Molecular Liquids*

Received date: 8 December 2016

Accepted date: 13 February 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Cellulose based grafted biosorbents- Journey from lignocellulose biomass to toxic metal ions sorption applications-A review

## Table of contents:

1. Introduction
2. General chemistry and different allomorphs of cellulose
3. Pre-treatment techniques for the extraction of cellulose from lignocellulosic biomass
  - 3.1. Biological pre-treatment
  - 3.2. Chemical pre-treatment
    - 3.2.1. Acidic pre-treatment
    - 3.2.2. Alkaline pre-treatment
    - 3.2.3. Oxidation
    - 3.2.4. Use of ionic solvents as greener solvents
    - 3.2.5. Organo-solvation or solvent extraction
  - 3.3. Physical pre-treatment
    - 3.3.1. Pyrolysis and torrefaction
    - 3.3.2. Mechanical comminution
    - 3.3.3. Sonication
    - 3.3.4. Irradiations
    - 3.3.5. Liquid hot-water (LHW) pre-treatment
    - 3.3.6. Pulsed-electric-field
    - 3.3.7. Extrusion
  - 3.4. Physico-chemical pre-treatment
