Different morphologies of aluminum nanoclusters: Effect of pressure on solid-liquid phase transition of the nanoclusters using molecular dynamics simulations

Hamed Akbarzadeh, Mohsen Abbaspour

PII: S0167-7322(16)33160-9
DOI: doi:[10.1016/j.molliq.2016.12.117](https://doi.org/10.1016/j.molliq.2016.12.117)
Reference: MOLLIQ 6811

To appear in: *Journal of Molecular Liquids*

Received date: 13 October 2016
Revised date: 18 December 2016
Accepted date: 21 December 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Different morphologies of aluminum nanoclusters:
Effect of pressure on solid-liquid phase transition of the
nanoclusters using molecular dynamics simulations**
