Methane steam reforming rates over Pt, Rh and Ni(111) accounting for H tunneling and for metal lattice vibrations

Ernst D. German, M. Sheintuch

PII: S0039-6028(16)30035-8
DOI: doi: [10.1016/j.susc.2016.03.024](https://doi.org/10.1016/j.susc.2016.03.024)
Reference: SUSC 20855

To appear in: *Surface Science*

Received date: 22 December 2015
Revised date: 21 March 2016
Accepted date: 22 March 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**METHANE STEAM REFORMING RATES OVER Pt, Rh and Ni
(111) ACCOUNTING FOR H TUNNELING AND FOR METAL
LATTICE VIBRATIONS**

Ernst D. German, and M. Sheintuch
