Nerve growth factor-loaded heparinized cationic solid lipid nanoparticles for regulating membrane charge of induced pluripotent stem cells during differentiation

Yung-Chih Kuo, Rajendiran Rajesh

PII: S0928-4931(17)31039-1

DOI: doi: [10.1016/j.msec.2017.03.303](https://doi.org/10.1016/j.msec.2017.03.303)

Reference: MSC 7815

To appear in: *Materials Science & Engineering C*

Received date: 19 March 2017

Revised date: 27 March 2017

Accepted date: 31 March 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Nerve growth factor-loaded heparinized cationic solid lipid nanoparticles for regulating
membrane charge of induced pluripotent stem cells during differentiation**
