The influence of the stabilizing agent SDS on porosity development in alkali-activated fly-ash based foams

L. Korat, V. Ducman

PII: S0958-9465(16)30305-5

DOI: [10.1016/j.cemconcomp.2017.03.010](https://doi.org/10.1016/j.cemconcomp.2017.03.010)

Reference: CECO 2798

To appear in: *Cement and Concrete Composites*

Received Date: 27 June 2016

Revised Date: 30 January 2017

Accepted Date: 16 March 2017

Please cite this article as: L. Korat, V. Ducman, The influence of the stabilizing agent SDS on porosity development in alkali-activated fly-ash based foams, *Cement and Concrete Composites* (2017), doi: 10.1016/j.cemconcomp.2017.03.010.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**The influence of the stabilizing agent SDS on porosity development in alkali-activated fly-ash based foams**
