Structure and Conformation of Polyetheramine in Confined Space of Graphene Oxide and Its Enhancement on the Electrically Conductive properties of Monomer Casting Nylon-6

Meng Xiang, Chengjie Li, Lin Ye

PII: S1359-835X(16)30453-5

DOI: <http://dx.doi.org/10.1016/j.compositesa.2016.12.025>

Reference: JCOMA 4530

To appear in: *Composites: Part A*

Received Date: 14 September 2016

Revised Date: 12 December 2016

Accepted Date: 27 December 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Structure and Conformation of Polyetheramine in Confined Space of Graphene Oxide and Its Enhancement on the Electrically Conductive properties of Monomer Casting Nylon-6
