Title: Evolution and interaction of corrosive species during the initial NaCl particle induced corrosion on zinc coated skin-passed steel

Authors: Georg Hölzl, Gerald Luckeneder, Hubert Duchaczek, Christoph Kleber, Achim Walter Hassel

PII: S0010-938X(16)31110-6
DOI: <http://dx.doi.org/doi:10.1016/j.corsci.2017.08.001>
Reference: CS 7153

To appear in:

Received date: 4-11-2016
Revised date: 1-8-2017
Accepted date: 2-8-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Evolution and interaction of corrosive species during the initial NaCl particle induced corrosion on zinc coated skin-passed steel
