Title: Seed-mediated synthesis of floriated Ag nanoplates as surface enhanced Raman scattering substrate for in situ molecular detection

Authors: Tao Jiang, Xiaolong Wang, Jing Tang, Shiwei Tang

PII: S0025-5408(17)32283-3
DOI: <http://dx.doi.org/10.1016/j.materresbull.2017.08.048>
Reference: MRB 9527

To appear in: *MRB*

Received date: 10-6-2017
Revised date: 27-7-2017
Accepted date: 25-8-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Seed-mediated synthesis of floriated Ag nanoplates as surface enhanced Raman scattering substrate for in situ molecular detection
