

## Accepted Manuscript

Title: Large electro-optic response of bulk ferroelectric crystals enhanced by piezoelectric resonance in the high frequency range

Authors: Jun Li, Yang Li, Qingxin Meng, Zhongxiang Zhou, Dechang Jia, Robert McIntosh, Amar S. Bhalla, Ruyan Guo

PII: S0025-5408(17)30367-7  
DOI: <http://dx.doi.org/10.1016/j.materresbull.2017.09.020>  
Reference: MRB 9561

To appear in: *MRB*

Received date: 2-2-2017  
Revised date: 19-7-2017  
Accepted date: 15-9-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Large electro-optic response of bulk ferroelectric crystals enhanced by piezoelectric resonance in the high frequency range

Graphical Abstract:

## Highlights:

- The EO effect of ferroelectric Li-doped niobium-rich potassium tantalate niobate ( $\text{K}_{0.95}\text{Li}_{0.05}\text{Ta}_{1-x}\text{Nb}_x\text{O}_3$ ; KLTN) single crystals were determined using improved dynamic EO measurement carried out via a continuous frequency scan over the
