

Accepted Manuscript

Controllable synthesis and electrochemical performance of hierarchically structured graphene fibers

Yunming Jia, Mei Zhang, Hongwei Li, Jianming Wang, Fanglan Guan

PII: S0254-0584(17)30146-3

DOI: 10.1016/j.matchemphys.2017.02.014

Reference: MAC 19509

To appear in: *Materials Chemistry and Physics*

Received Date: 14 July 2016

Revised Date: 24 January 2017

Accepted Date: 02 February 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Fabrication and structure design of graphene fibers.
- A controllable temperature leads to a hierarchical and porous structure.
- The hierarchical and ordered structure is beneficial to flexibility and conductivity.
- The graphene fibers show good specific capacitance and structure stability.
