Novel 3D composites with highly flexible behavior based on chitosan and bioactive glass for biomedical applications

Talita Martins, Agda A.R. Oliveira, Ana Celeste Oliveira, Túlio P. Boaventura, Breno R. Barrioni, Ezequiel S. Costa-Júnior, Marivalda M. Pereira

PII: S0254-0584(16)30913-0

DOI: [10.1016/j.matchemphys.2016.12.012](https://doi.org/10.1016/j.matchemphys.2016.12.012)

Reference: MAC 19343

To appear in: *Materials Chemistry and Physics*

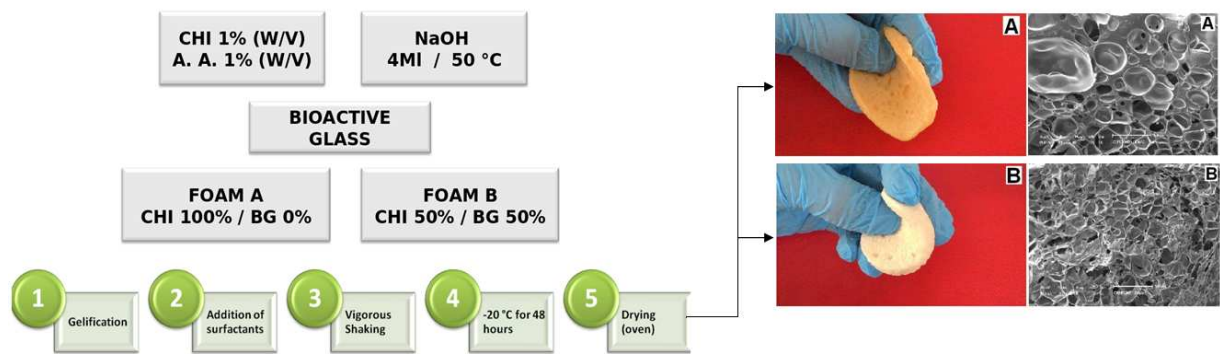

Received Date: 31 August 2016

Revised Date: 9 November 2016

Accepted Date: 11 December 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
