

Accepted Manuscript

Effect of niobium addition in support catalysts applied in satellite propulsion

M.S. Soares, R.D. Barbosa, G.M. da Cruz, J.A.J. Rodrigues, S. Ribeiro

PII: S0254-0584(16)30929-4

DOI: 10.1016/j.matchemphys.2016.12.030

Reference: MAC 19361

To appear in: *Materials Chemistry and Physics*

Received Date: 07 March 2016

Revised Date: 09 November 2016

Accepted Date: 12 December 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

Investigation of the addition of niobium oxide on the alumina applied to propulsion

Evaluation of support preparation methodologies for catalysts applied to propulsion

Increased the crush strength of the support aluminum oxide applied to propulsion
