

Wave propagation in fluid-conveying viscoelastic single-walled carbon nanotubes with surface and nonlocal effects

Ya-Xin Zhen

PII: S1386-9477(16)30939-0
DOI: <http://dx.doi.org/10.1016/j.physe.2016.10.037>
Reference: PHYSE12626

To appear in: *Physica E: Low-dimensional Systems and Nanostructures*

Received date: 25 August 2016
Revised date: 24 October 2016
Accepted date: 24 October 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
