

## Author's Accepted Manuscript

Advanced Anode for Sodium-ion Battery with Promising Long Cycling Stability Achieved by Tuning Phosphorus-Carbon Nanostructures

Zhaoxin Yu, Jiangxuan Song, Daiwei Wang, Donghai Wang

PII: S2211-2855(17)30496-2  
DOI: <http://dx.doi.org/10.1016/j.nanoen.2017.08.019>  
Reference: NANOEN2133

To appear in: *Nano Energy*

Received date: 7 July 2017  
Revised date: 10 August 2017  
Accepted date: 12 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Advanced Anode for Sodium-ion Battery with  
Promising Long Cycling Stability Achieved by  
Tuning Phosphorus-Carbon Nanostructures
