A Facile Molecularly Engineered Copper (II) Phthalocyanine as Hole Transport Material for Planar Perovskite Solar Cells with Enhanced Performance and Stability

Guang Yang, Yu-Long Wang, Jia-Ju Xu, Hong-Wei Lei, Cong Chen, Hai-Quan Shan, Xiao-Yuan Liu, Zong-Xiang Xu, Guo-Jia Fang

PII: S2211-2855(16)30534-1
DOI: <http://dx.doi.org/10.1016/j.nanoen.2016.11.039>
Reference: NANOEN1630

To appear in: *Nano Energy*

Received date: 18 September 2016
Revised date: 14 October 2016
Accepted date: 20 November 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain
