Stress relaxation behavior and mechanisms in Ti-6Al-4V determined via *in situ* neutron diffraction: Application to additive manufacturing

Zhuqing Wang, Alexandru D. Stoica, Dong Ma, Allison M. Beese

PII: S0921-5093(17)31232-7  
DOI: <http://dx.doi.org/10.1016/j.msea.2017.09.071>  
Reference: MSA35538

To appear in: *Materials Science & Engineering A*

Received date: 24 May 2017  
Revised date: 15 September 2017  
Accepted date: 16 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

This manuscript has been authored by UT-Battelle, LLC under Contract No. DE-AC05-00OR22725 with the U.S. Department of Energy. The United States Government retains and the publisher, by accepting the article for publication, acknowledges that the United States Government retains a non-exclusive, paid-up, irrevocable, world-wide license to publish or reproduce the published form of this manuscript, or allow others to do so, for United States Government purposes. The Department of Energy will provide public access to these results of federally sponsored research in accordance with the DOE Public Access Plan(<http://energy.gov/downloads/doe-public-access-plan>).
