Influence of Microstructure on Fatigue Crack Nucleation and Microstructurally Short Crack Growth of an Austenitic Stainless Steel

Jonathan W. Pegues, Michael D. Roach, Nima Shamsaei

PII: S0921-5093(17)31239-X
DOI: <http://dx.doi.org/10.1016/j.msea.2017.09.081>
Reference: MSA35548

To appear in: *Materials Science & Engineering A*

Received date: 19 April 2017
Revised date: 2 August 2017
Accepted date: 18 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Influence of Microstructure on Fatigue Crack Nucleation and Microstructurally Short Crack Growth of an Austenitic Stainless Steel
