This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: High temperature low cycle fatigue and creep-fatigue behavior of a casting Al-9Si-CuMg alloy used for cylinder heads

Authors: Bingbin Guo, Weizheng Zhang, Shaoguang Li,
Xiaosong Wang

Affiliation and address: School of Mechanical Engineering, Beijing Institute of Technology, Beijing 100081, China

Correspondence: Weizheng Zhang. E-mail: zhangwz@bit.edu.cn
