## Interfacial Failure in Dissimilar Weld Joint of High Boron 9% Chromium Steel and Nickel-Based Alloy under High-Temperature Creep Condition

Tetsuya Matsunaga, Hiromichi Hongo, Masaaki Tabuchi

PII: S0921-5093(17)30453-7  
DOI: <http://dx.doi.org/10.1016/j.msea.2017.04.012>  
Reference: MSA34913

To appear in: *Materials Science & Engineering A*

Received date: 26 January 2017  
Revised date: 27 March 2017  
Accepted date: 3 April 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
