

Subject index

β structural stability

- Effects of Nb and Zr on structural stabilities of Ti-Mo-Sn-based alloys with low modulus, 1

Ω phase

- Quantitative transmission electron microscopy and atom probe tomography study of Ag-dependent precipitation of Ω phase in Al-Cu-Mg alloys, 8

2219 Al alloys

- Development of a high temperature high strength Al alloy by addition of small amounts of Sc and Mg to 2219 alloy, 221

AA6082

- Secondary precipitation during homogenization of Al-Mg-Si alloys: Influence on high temperature flow stress, 175

Ageing

- Effect of pre-ageing on dynamic strain ageing in Al-Mg-Si alloys, 323

Aging prior to ECAP

- Improved tensile properties of an equal channel angular pressed (ECAPed) Mg-8Sn-6Zn-2Al alloy by prior aging treatment, 148

Aging

- Quantitative transmission electron microscopy and atom probe tomography study of Ag-dependent precipitation of Ω phase in Al-Cu-Mg alloys, 8

Al alloy composites

- Microstructural and mechanical anisotropy of extruded in-situ TiB₂/2024 composite plate, 131

Al/Bronze

- Welding parameters analysis and microstructural evolution of dissimilar joints in Al/Bronze processed by friction stir welding and their effect on engineering tensile behavior, 288

Al2024 alloy

- Achieving enhanced strength in ultrafine lamellar structured Al2024 alloy via mechanical milling and spark plasma sintering, 155

Al-Cu-Mg-Ag alloys

- Quantitative transmission electron microscopy and atom probe tomography study of Ag-dependent precipitation of Ω phase in Al-Cu-Mg alloys, 8

AlMg alloy

- High strain rate superplasticity in an Al-Mg-Sc-Zr alloy processed via simple rolling, 298

Aluminium alloy

- Secondary precipitation during homogenization of Al-Mg-Si alloys: Influence on high temperature flow stress, 175

Aluminium alloys

- Effect of pre-ageing on dynamic strain ageing in Al-Mg-Si alloys, 323

Aluminum

- High-resolution TEM microscopy study of the creep behaviour of carbon-based cathode materials, 107

Aluminum

- Improvement of mechanical properties of AA6063 aluminum alloy after equal channel angular pressing by applying a two-stage solution treatment, 54

Aluminum

- Sensitivity of polycrystal plasticity to slip system kinematic hardening laws for Al 7075-T6, 241

Anisotropy

- Microstructural and mechanical anisotropy of extruded in-situ TiB₂/2024 composite plate, 131

Anisotropy

- Twin-induced hardening in extruded Mg alloy AM30, 17

Atom probe tomography

- Development of a high temperature high strength Al alloy by addition of small amounts of Sc and Mg to 2219 alloy, 221

Atom probe tomography

- Quantitative transmission electron microscopy and atom probe tomography study of Ag-dependent precipitation of Ω phase in Al-Cu-Mg alloys, 8

Austenitic stainless steel

- Limitations on the hardness increase in 316L stainless steel under dynamic plastic deformation, 306

Austenitic steel

- On the effect of chemical composition on yield strength of TWIP steels, 82

Bimodal microstructure

- Characterization of fracture in medium Mn steel, 200

Buffing

- Distinguishing effect of buffing vs. grinding, milling and turning operations on the chloride induced SCC susceptibility of 304L austenitic stainless steel, 193

Carbon cathode

- High-resolution TEM microscopy study of the creep behaviour of carbon-based cathode materials, 107

Cemented carbides

- Effects of NbC additions on the microstructure and properties of non-uniform structure WC-Co cemented carbides, 259

Ceramic-matrix composites

- Effect of impact energy on damage resistance and mechanical property of C/SiC composites under low velocity impact, 141

Corrosion resistance

- Effects of NbC additions on the microstructure and properties of non-uniform structure WC-Co cemented carbides, 259

- Cracks
 - Characterization of fracture in medium Mn steel, 200
- Creep mechanism
 - High-resolution TEM microscopy study of the creep behaviour of carbon-based cathode materials, 107
- Crystal plasticity finite element method
 - Microstructure-based modeling of tensile deformation of a friction stir welded AZ31 Mg alloy, 63
- Crystal plasticity
 - Sensitivity of polycrystal plasticity to slip system kinematic hardening laws for Al 7075-T6, 241
- Crystal plasticity
 - Twin-induced hardening in extruded Mg alloy AM30, 17
- Crystallization transformation
 - High-resolution TEM microscopy study of the creep behaviour of carbon-based cathode materials, 107
- Cu
 - Achieving good strength-ductility synergy of friction stir welded Cu joint by using large load with extremely low welding speed and rotation rate, 73
- Cyclic damage
 - The influence of microstructure on the cyclic deformation and damage of copper and an oxide dispersion strengthened steel studied via in-situ micro-beam bending, 313
- Cyclic loading
 - Sensitivity of polycrystal plasticity to slip system kinematic hardening laws for Al 7075-T6, 241
- Damage tolerance
 - Effect of impact energy on damage resistance and mechanical property of C/SiC composites under low velocity impact, 141
- Deformation behavior
 - Investigation on compression behavior of TZM and La₂O₃ doped TZM Alloys at high temperature, 276
- Deformation mechanism
 - Microstructure-based modeling of tensile deformation of a friction stir welded AZ31 Mg alloy, 63
- Deformation mechanisms
 - Deformation mechanisms in nanotwinned copper by molecular dynamics simulation, 343
- Directional solidification
 - A novel method to directional solidification of TiAlNb alloys by mixing binary TiAl ingot and Nb wire, 181
- Dislocation
 - Deformation mechanisms in nanotwinned copper by molecular dynamics simulation, 343
- Dispersoids
 - Secondary precipitation during homogenization of Al-Mg-Si alloys: Influence on high temperature flow stress, 175
- Dynamic recrystallization
 - High strain rate superplasticity in an Al-Mg-Sc-Zr alloy processed via simple rolling, 298
- Dynamic strain ageing
 - Effect of pre-ageing on dynamic strain ageing in Al-Mg-Si alloys, 323
- EBSD
 - Welding parameters analysis and microstructural evolution of dissimilar joints in Al/Bronze processed by friction stir welding and their effect on engineering tensile behavior, 288
- electron microscopy
 - Effects of Nb and Zr on structural stabilities of Ti-Mo-Sn-based alloys with low modulus, 1
- Electron microscopy
 - Fabrication and in situ compression testing of Mg micropillars with a nontrivial cross section: Influence of micropillar geometry on mechanical properties, 337
- Electron microscopy
 - Quantifying the properties of low-cost powder metallurgy titanium alloys, 47
- Equal channel angular pressing
 - Improvement of mechanical properties of AA6063 aluminum alloy after equal channel angular pressing by applying a two-stage solution treatment, 54
- Fatigue
 - Effect of bimodal grain size distribution on fatigue properties of Ti-6Al-4V alloy with harmonic structure under four-point bending, 269
- Flow localization
 - Characterization of fracture in medium Mn steel, 200
- Flow stress
 - Secondary precipitation during homogenization of Al-Mg-Si alloys: Influence on high temperature flow stress, 175
- Foam
 - The effect of slurry composition on microstructure and mechanical properties of open-cell Inconel foams manufactured by the slurry coating technique, 123
- Fractography
 - Effect of bimodal grain size distribution on fatigue properties of Ti-6Al-4V alloy with harmonic structure under four-point bending, 269
- Fractography
 - Microstructural and mechanical anisotropy of extruded in-situ TiB₂/2024 composite plate, 131
- Fracture behavior
 - Investigation on compression behavior of TZM and La₂O₃ doped TZM Alloys at high temperature, 276
- Fracture morphology
 - A novel method to directional solidification of TiAlNb alloys by mixing binary TiAl ingot and Nb wire, 181
- Fracture toughness
 - Mechanical properties of microconstituents in Nb-Si-Ti alloy by micropillar compression and nanoindentation, 99
- Fracture
 - Characterization of fracture in medium Mn steel, 200
- Friction stir welding
 - Achieving good strength-ductility synergy of friction stir welded Cu joint by using large load with extremely low welding speed and rotation rate, 73
- Friction stir welding
 - Microstructure and mechanical characterization of friction stir welded high strength low alloy steels, 39
- Friction stir welding
 - Microstructure-based modeling of tensile deformation of a friction stir welded AZ31 Mg alloy, 63
- Friction stir welding
 - Welding parameters analysis and microstructural evolution of dissimilar joints in Al/Bronze processed by friction stir welding and their effect on engineering tensile behavior, 288
- Friction Welding
 - Assessment of microstructure and tensile behavior of continuous drive friction welded titanium tubes, 249
- GdH₂
 - Microstructure and mechanical properties of laser melting deposited GW103K Mg-RE alloy, 281
- Grain boundary sliding
 - Superplasticity in high temperature magnesium alloy WE43, 85
