

Accepted Manuscript

Electrochemical synthesis of Li-Mo-O compounds as novel and high performance anode materials for lithium-ion batteries

Shu Huang, Min Zhou, Kangli Wang, Shijie Cheng, Guoping Yan, Kai Jiang

PII: S0925-8388(17)31203-3

DOI: [10.1016/j.jallcom.2017.04.029](https://doi.org/10.1016/j.jallcom.2017.04.029)

Reference: JALCOM 41430

To appear in: *Journal of Alloys and Compounds*

Received Date: 29 November 2016

Revised Date: 30 March 2017

Accepted Date: 3 April 2017

Please cite this article as: S. Huang, M. Zhou, K. Wang, S. Cheng, G. Yan, K. Jiang, Electrochemical synthesis of Li-Mo-O compounds as novel and high performance anode materials for lithium-ion batteries, *Journal of Alloys and Compounds* (2017), doi: 10.1016/j.jallcom.2017.04.029.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Table of Contents

Lithium molybdates are synthesized via a facile molten salt based electrochemical route and exhibit high performance of Li⁺ storage.
