A promising of alloying modified beta-type Titanium-Niobium implant for biomedical applications: Microstructural characteristics, *in vitro* biocompatibility and antibacterial performance

Keng-Liang Ou, Chao-Chia Weng, Yun-Ho Lin, Mao-Suan Huang

PII: S0925-8388(16)34038-5

DOI: [10.1016/j.jallcom.2016.12.120](https://doi.org/10.1016/j.jallcom.2016.12.120)

Reference: JALCOM 40042

To appear in: *Journal of Alloys and Compounds*

Received Date: 25 October 2016

Revised Date: 6 December 2016

Accepted Date: 10 December 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
