A Kelvin probe force microscopy study of hydrogen insertion and desorption into 2024 aluminum alloy

Manon Chloé Lafouresse, Marie-Laetitia de Bonfils-Lahovary, Cédric Charvillat, Loïc Oger, Lydia Laffont, Christine Blanc

PII: S0925-8388(17)32142-4

DOI: [10.1016/j.jallcom.2017.06.143](https://doi.org/10.1016/j.jallcom.2017.06.143)

Reference: JALCOM 42212

To appear in: *Journal of Alloys and Compounds*

Received Date: 5 December 2016

Revised Date: 24 May 2017

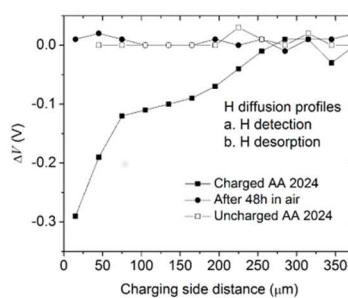

Accepted Date: 13 June 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Step 3: Data analysis
