Influences of crystallographic texture and nanostructural features on corrosion properties of electrogalvanized and chromate conversion coatings

Narin Jantaping, Christopher A. Schuh, Yuttanant Boonyongmaneerat

PII: S0257-8972(17)30908-8
DOI: doi: [10.1016/j.surfcoat.2017.09.022](https://doi.org/10.1016/j.surfcoat.2017.09.022)
Reference: SCT 22660
To appear in: *Surface & Coatings Technology*
Received date: 10 May 2017
Revised date: 4 September 2017
Accepted date: 9 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Influences of crystallographic texture and nanostructural features on corrosion properties of electrogalvanized and chromate conversion coatings
