

Accepted Manuscript

High deposition rate nanocrystalline and amorphous silicon thin film production via surface wave plasma source

Jason Peck, Piyum Zonooz, Davide Curreli, Gianluca Panici, Brian Jurczyk, David N. Ruzic

PII: S0257-8972(17)30553-4
DOI: doi: [10.1016/j.surfcoat.2017.05.074](https://doi.org/10.1016/j.surfcoat.2017.05.074)
Reference: SCT 22393
To appear in: *Surface & Coatings Technology*
Received date: 12 January 2017
Revised date: 23 May 2017
Accepted date: 25 May 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

High deposition rate nanocrystalline and amorphous silicon thin film production via surface wave plasma source
